VEDANT ANILBHAI KURALKAR

Cyber Security Analyst | SOC & Threat Detection

Ahmedabad, Gujarat, India | +91 87995 57806 | kuralkarvedant110@gmail.com | Portfolio: vedant1111.github.io/my-portfolio/ | LinkedIn: linkedin.com/in/vedant-kuralkar-894a32221 | GitHub: github.com/vedant1111

PROFESSIONAL SUMMARY

Detail-oriented and entry-level Cyber Security professional with hands-on foundational lab experience in log analysis, incident triage, and telemetry monitoring. Demonstrated analytical ability through practical cyber threat investigations and phishing analysis using Kusto Query Language (KQL) and OSINT tools. Eager to apply investigative logic and a strong commitment to continuous learning within a Tier 1 SOC Analyst role.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern | CyArt Tech LLP, Ahmedabad **July 2026 – Present**

- Assist in monitoring Wazuh SIEM dashboards to identify basic anomalous endpoint behavior and potential brute-force authentication attempts.
- Analyze network traffic using Wireshark to understand packet structures and baseline network communications.
- Support the team in conducting scheduled vulnerability scans and reviewing basic CVSS severity scores.

Associate - Records Retrieval & Legal Support | Mangalam Information Technologies Pvt. Ltd., Ahmedabad **Feb 2024 – May 2025**

- Managed records retrieval requests, ensuring accurate data extraction and compliance with legal support requirements.
- Maintained high attention to detail in document processing and cross-team communication in a structured corporate environment.

PRACTICAL SOC EXPERIENCE & PROJECTS

KC7 Cyber Threat Investigations (Hands-On Log Analysis)

- Completed multiple data-driven cybersecurity investigation modules (including Clout Defender, Valdorian Times, and Rap Beef) simulating real-world SOC environments.
- Utilized Kusto Query Language (KQL) to analyze employee logs, inbound/outbound network traffic, and passive DNS data to trace attacker infrastructure.
- Investigated targeted phishing campaigns and social engineering attacks, leveraging VirusTotal for comprehensive file hash, domain, and IP threat analysis.

Foundational SOC Home Lab (Telemetry & SIEM)

- Built a virtualized lab environment integrating Kali Linux and Windows 10 endpoints with a Wazuh SIEM manager.
- Configured basic telemetry ingestion to capture Windows Event Logs and Sysmon data for process creation and network connections.
- Investigated brute-force authentication indicators by reviewing Windows Event IDs 4625 (Failed Logon) and 4624 (Successful Logon).

TECHNICAL SKILLS

Core Concepts: Incident Triage, Log Analysis, Phishing Investigation, TCP/IP Fundamentals, Basic Threat Detection

Tools & Platforms: Wazuh SIEM, Wireshark, VirusTotal, Windows Event Viewer, Nmap

Languages & Environments: Kusto Query Language (KQL), Windows 10/11, Kali Linux, Oracle VirtualBox

CERTIFICATIONS

- **ISC2 Certificate of Completion:** CC Course Conclusion & Final Assessment (Jan 2026)
- **KC7 Foundation Cybersecurity Badges:** KQL 101, VirusTotal Fundamentals, Clout Defender, Rap Beef, Valdorian Times, Super Fan (Oct 2026)
- **Certified Cyber Defence Professional (CCDP):** Demmisto Technologies Pvt. Ltd. (April 2026)
- **Certified Information & Offensive Security Expert (CIOSE):** Demmisto Technologies Pvt. Ltd. (April 2026)
- **Introduction to Cybersecurity:** Cisco Networking Academy

EDUCATION

Bachelor of Computer Applications (BCA) | Silver Oak University, Ahmedabad **2021 – 2025 (Conferred Feb 2026)**
